Press Release

For Immediate Release, 9 A.M. EST, February 5, 2018

This year, we will help you embrace the new and exciting waves of trends that re-write retail and food service history, by designing and manufacturing new sustainable solutions for operational efficiency, cost savings and supply chain advantage.

New Product Release

Aluminum Rotisserie Storage/Transport Rack, Model AL-1806BP/XB/5PU/DP - "Let the rotisseries tackle evolving food menus."

The introduction of the AL-1806BP/XB/5PU/DP ensures supermarket and food service operators are prepared to support their rotisserie department by making storage and transportation of large volumes of poultry efficient, hygienic and hassle-free. Supermarkets and food service operators are constantly battling shrinking footprints, increasing costs and evolving food menus. Known for their low costs of production and versatility, rotisseries are becoming increasingly popular amongst every type of food service operation.

After listening to the voices of our customers, Winholt has designed and developed an aluminum rack with a stainless steel drip pan. The rack is capable of holding 6 standard trays (18"x26") at a time, each tray having the capacity of 6 stacked spickets. The stainless steel drip pan at the bottom prevents any spillage in the prep area, ensuring a sanitary environment. In addition to these features, each rack is equipped with 5" swivel polyurethane plate casters, making the unit mobile.

This rack leverages the use of vertical storage capacities and ensures efficiency by allowing large volumes of poultry to be transported or stored. This keeps the prep areas in rotisserie departments clutter-free, productive and clean.

Winholt Equipment Corporation, founded in 1946, is a leading global manufacturer of high quality Foodservice and Material Handling Equipment. Winholt's headquarters is located in Woodbury, New York, with additional locations in PA, TX, CA, and China. Winholt supplies equipment to supermarkets, retailers, restaurants, and foodservice dealers in the United States and globally. The company's products are used in over 200,000 locations, including most major retailers, restaurants and foodservice chains. Winholt is a member of the National Association of Food Equipment Manufacturers, Manufacturers' Agents Association for the Foodservice Industry and the MHI Material Handling Industry Association.

New Product Release

Aluminum Cooler/Backroom Shelving, Model ALMCS-60-224-79H/2S – “Organized Vertical Space Capitalization”

The ALMCS-60-224-79H/2S is designed for operators who are always striving to optimize the space utilized in backrooms and walk-in coolers. The need for a highly organized backroom or cooler arises from a growing need for sustainable “farm-to-table” experience.

To ensure the co-existence of a “farm-to-table” experience and cook-freeze concept in the same space, Winholt has designed an aluminum shelving unit. The shelf height on this unit can be easily adjusted, depending on the size of the item being stored. Additionally, the adjustable feature of the shelves ensures appropriate work height for your associates. This unit is also equipped with 6” swivel polyurethane casters, making the shelving solution mobile.

New Product Release

Stainless Steel Pack-out Station, Model DTR 3048/A3SR – “Ascends your assembly and pack out station”

The DTR 3048/A3SR is an innovative design solution for operators who are constantly looking for ways to reduce labor and number of product “touches”, during assembling and wrapping of food items. Supermarkets have been seeing a surge in the demand for pre-packaged food. A heightened level of hygiene and efficiency is needed when packaging food, so that racks in the front of the store can be replenished in shortest time possible.

We have designed and developed a stainless steel work table, constructed of all welded 14 Gauge 300 series stainless steel with a 48” gravity conveyor roller section. The table accommodates 3 stainless steel rods for holding product labels. The heights at which these rods are positioned can be adjusted in increments of 1” to match an associate’s comfortable work height. There are two additional rods situated below the table to hold additional film wrapper rolls for the wrapping machine.

New Product Release

Mobile Insulated Stainless Steel Prep Station, Model CAB-3 – “Let your customers come back for more engagement and experience.”

The CAB-3 unit is an ideal solution for operators who are trying to embrace the increasingly popular “grab and go” prepared food lifestyle. Operators are trying to achieve heightened levels of engagement by positioning the food-shopping experience as an extension to health and wellness through “grab-and-go prepared” food, which is prepared in front of their customers with ingredients they select.

The CAB-3 unit is constructed of all welded Gauge 300 series stainless steel. This prep station has an in-built sloping trough with 1” thick polystyrene insulation. Lexan guards present on three sides of this station are removable, depending on the usage of the unit. Additional storage is available at the rear of the station, with shelves, which can be adjusted in increments of 2”. A drain lever is strategically placed in the cabinet. A 5/8 inch cutting board station is built into this unit. The entire prep station is equipped with polyurethane casters with brakes.

The mobile insulated stainless steel prep station increases customer engagement through various departments in the supermarket, while maintaining necessary levels of hygiene and food safety. The sloping trough in front of this unit, creates a landscaping display that gives the customers easy visibility of premium items displayed, thereby encouraging their participation in preparing food.
